IMPORTANCE OF MENSTRUAL HYGIENE

Hygiene-related practices of women during menstruation are of considerable importance, as it may increase vulnerability to Reproductive Tract Infections (RTI's). Poor menstrual hygiene is one of the major reasons for the high prevalence of RTIs in the country and contributes significantly to female morbidity.

About Menstrual Cup

This menstrual is a type of reusable feminine hygiene product. It's a small, flexible funnel-shaped cup made of 100% Food grade silicone that you insert into your vagina to catch and collect period fluid. These Cups can hold more blood than other methods, leading many women to use them as an eco-friendly alternative to tampons or unhygienic pads.

These cups comes in 2 different sizes which you can choose depending upon your level of flow. All the details instructions are present on the box of these cups in terms of its usage and size.

Beginning of a menstrual cup

A menstrual cup is a type of reusable feminine hygiene product. It's a small, flexible funnel-shaped cup made of rubber or silicone that you insert into your vagina to catch and collect period fluid. Cups can hold more blood than other methods, leading many women to use them as an eco-friendly alternative to tampons and sanitary pads.

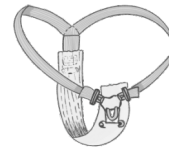

Since ages

Women used dark underwear to hide the blood as there were no period products.

Menstrual napkins, that could be pinned or clipped to belts start being used.

1854

Early 1900s

Women start using gauze or diaper fabric for menstrual purposes.

Earle Haas patents the first version of the modern tampon, 'Tampax'.

1933

1937

Leona Chalmers invents and patents the first version of the menstrual cup.

Menstrual cups introduced in medical grade silicone for the first time. This is when cups start becoming popular.

2000s

2021

MenstrualCUP is born
